Crafting Type: What Software Freedom Means To Me

Jonathan "Duke" Leto

What is Software Freedom?

Everyone should have the freedom to look at, distribute and modify (if they want) software.

What is Software Freedom?

A "commons", where anybody with an Internet
connection has the freedom to access and contribute to
free software.

What is Software Freedom?

Every time somebody write Free Software, everybody in the world benefits from it. No one is excluded.

What is the opposite of Software Freedom?

Software Oppression

- Blocking communication
- i.e. Preventing knowledge transfer for financial/power gain
- Propaganda
- Orwellian Augmented Reality

What is the difference
between Free and Open?

Open = derivative works can be proprietary/commercial
Free = "viral" openness + freedom

Why Should I Care?

Everybody benefits from free and open code and data.
Only a select few people benefit from proprietary code or
data.

Interesting Projects

- FontForge
- Font Awesome - Iconic font
- Twitter Bootstrap - Responsive by default
